ADVCOMP 2016

Forward

The Tenth International Conference on Advanced Engineering Computing and Applications in Sciences (ADVCOMP 2016), held between October 9 and 13, 2016 in Venice, Italy, continued a series of events addressing the fundamentals advanced scientific computing and specific mechanisms and algorithms for particular sciences. The conference provided a forum where researchers were able to present recent research results and new research problems and directions related to them.

With the advent of high performance computing environments, virtualization, distributed and parallel computing, as well as the increasing memory, storage and computational power, processing particularly complex scientific applications and voluminous data is more affordable. With the current computing software, hardware and distributed platforms effective use of advanced computing techniques is more achievable.

The event was very competitive in its selection process and very well perceived by the international scientific and industrial communities. As such, it has attracted excellent contributions and active participation from all over the world. We were very pleased to receive a large amount of top quality contributions.

The conference had the following tracks:
- Computation Methods
- Computing Applications in Science
- Computational Mathematics in Real-life Applications
- Geometry and Logic

We take here the opportunity to warmly thank all the members of the ADVCOMP 2016 technical program committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to ADVCOMP 2016. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the ADVCOMP 2016 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope ADVCOMP 2016 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of advanced engineering computing and applications.

We also hope that Venice, Italy, provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.
ADVCOMP Advisory Committee

Chih-Cheng Hung, Southern Polytechnic State University, USA
Juha Röning, Oulu University, Finland
Erich Schweighofer, University of Vienna, Austria
Paul Humphreys, University of Ulster, UK
Danny Krizanc, Wesleyan University, USA
Ivan Rodero, Rutgers University - Piscataway, USA
George Spanoudakis, City University London, UK
Vladimir Vlassov, KTH Royal Institute of Technology, Sweden
Jerry Trahan, Louisiana State University, USA
Dean Vucinic, Vrije Universiteit Brussel (VUB), Belgium
Rudolf Berrendorf, Bonn-Rhein-Sieg University, Germany
Wenbing Zhao, Cleveland State University, USA
Camelia Muñoz-Caro, Universidad de Castilla-La Mancha, Spain
Laurent Réveillère, Bordeaux Institute of Technology, France
Ewa Grabska, Jagiellonian University - Krakow, Poland

ADVCOMP Industry/Research Chairs

Jorge Ejarque Artigas, Barcelona Supercomputing Center (BSC-CNS), Spain
Helmut Reiser, Leibniz Supercomputing Centre (LRZ)-Garching, Germany
H. Metin Aktulga, Lawrence Berkeley National Lab, USA
Sameh Elnikety, Microsoft Research, USA
Umar Farooq, Amazon.com - Seattle, USA
Alice Koniges, Lawrence Berkeley Laboratory/NERSC, USA
Peter Müller, IBM Zurich Research Laboratory- Rüschlikon, Switzerland
Simon Tsang, Applied Communication Sciences, Basking Ridge, USA
Anna Schwanengel, Siemens AG, Germany
Christoph Fuenfzig, Fraunhofer ITWM, Germany
