

INTERNET 2013

Foreword

The Fifth International Conference on Evolving Internet (INTERNET 2013), held between July 21 and July 26, 2013 in Nice, France, dealt with challenges raised by the evolving Internet making use of the progress in different advanced mechanisms and theoretical foundations. The gap analysis aimed at mechanisms and features concerning the Internet itself, as well as special applications for software defined radio networks, wireless networks, sensor networks, or Internet data streaming and mining.

Originally designed in the spirit of interchange between scientists, the Internet reached a status where large-scale technical limitations impose rethinking its fundamentals. This refers to design aspects (flexibility, scalability, etc.), technical aspects (networking, routing, traffic, address limitation, etc), as well as economics (new business models, cost sharing, ownership, etc.). Evolving Internet poses architectural, design, and deployment challenges in terms of performance prediction, monitoring and control, admission control, extendibility, stability, resilience, delay-tolerance, and interworking with the existing infrastructures or with specialized networks.

We take here the opportunity to warmly thank all the members of the INTERNET 2013 Technical Program Committee, as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to INTERNET 2013. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the INTERNET 2013 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that INTERNET 2013 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of the evolving Internet.

We are convinced that the participants found the event useful and communications very open. We hope that Nice, France provided a pleasant environment during the conference and everyone saved some time to enjoy the charm of this city.

INTERNET 2013 Chairs:

INTERNET Advisory Committee

Jaime Lloret Mauri, Polytechnic University of Valencia, Spain
Eugen Borcoci, University "Politehnica" Bucharest, Romania
Abdulrahman Yarali, Murray State University, USA

INTERNET Special Area Chairs

Routing

Mark Yampolskiy, Leibniz-Rechenzentrum (LRZ) - Garching, Germany

Traffic

Vladimir Zaborovsky, Technical University - Saint-Petersburg, Russia

Cloud and Internet

Massimo Villari, University of Messina, Italy

Security

Dirceu Cavendish, Kyushu Institute of Technology, Japan
