PESARO 2017

Forward

The Seventh International Conference on Performance, Safety and Robustness in Complex Systems and Applications (PESARO 2017), held between April 23-27, 2017 in Venice, Italy, continued a series of special events dedicated to fundamentals, techniques and experiments to specify, design, and deploy systems and applications under given constraints on performance, safety and robustness.

There is a relation between organizational and design operational complexity of organization and systems and the degree of robustness and safety under given performance metrics. More complex systems and applications might not be necessarily more profitable, but are less robust. There are trade-offs involved in designing and deploying distributed systems. Some designing technologies have a positive influence on safety and robustness, even operational performance is not optimized. Under constantly changing system infrastructure and user behaviors and needs, there is a challenge in designing complex systems and applications with a required level of performance, safety and robustness.

The conference had the following tracks:
- Safety
- ESITIS: Evolution of Safety in Transportation and Industrial Systems
- MAIS: Machine Learning Algorithms in Image and Signal Processing

We take here the opportunity to warmly thank all the members of the PESARO 2017 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to PESARO 2017. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the PESARO 2017 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that PESARO 2017 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of performance, safety and robustness in complex system. We also hope that Venice, Italy provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

PESARO 2017 Committee

PESARO Steering Committee
Wolfgang Leister, Norsk Regnesentral (Norwegian Computing Center), Norway
Mohammad Rajabali Nejad, University of Twente, the Netherlands
Omar Smadi, Iowa State University, USA
Yulei Wu, University of Exeter, UK

PESARO Industry/Research Advisory Committee
John Favaro, INTECS, Italy
Jean-Pierre Seifert, TU Berlin & FhG SIT Darmstadt, Germany
Roger Rivett, Jaguar Land Rover, UK
