# SERVICE COMPUTATION 2022

# Forward

The Fourteenth International Conferences on Advanced Service Computing (SERVICE COMPUTATION 2022), held on April 24 - 28, 2022, continued a series of events targeting computation on different facets.

The ubiquity and pervasiveness of services, as well as their capability to be context-aware with (self-) adaptive capacities posse challenging tasks for services orchestration, integration, and integration. Some services might require energy optimization, some might require special QoS guarantee in a Web-environment, while others a certain level of trust. The advent of Web Services raised the issues of self-announcement, dynamic service composition, and third party recommenders. Society and business services rely more and more on a combination of ubiquitous and pervasive services under certain constraints and with particular environmental limitations that require dynamic computation of feasibility, deployment and exploitation.

Similar to the previous edition, this event attracted excellent contributions and active participation from all over the world. We were very pleased to receive top quality contributions.

We take here the opportunity to warmly thank all the members of the SERVICE COMPUTATION 2022 technical program committee, as well as the numerous reviewers. The creation of a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to SERVICE COMPUTATION 2022. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the SERVICE COMPUTATION 2022 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope SERVICE COMPUTATION 2022 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of computation. We also hope that Barcelona provided a pleasant environment during the conference and everyone saved some time to enjoy the historic charm of the city.

**SERVICE COMPUTATION 2022 Steering Committee**

Paul Humphreys, Ulster Business School/University of Ulster, UK
Arne Koschel, Hochschule Hannover, Germany
Annett Laube, Bern University of Applied Sciences (BUAS), Switzerland
Eugen Borcoci, University "Politehnica" of Bucharest, Romania

Andreas Hausotter, Hochschule Hannover - University of Applied Sciences and Arts, Hannover, Germany
Ozgu Can, Ege University, Turkey

**SERVICE COMPUTATION 2022 Publicity Chair**

Lorena Parra, Universitat Politecnica de Valencia, Spain
Javier Rocher, Universitat Politècnica de València, Spain
