

Table of Contents

A Modeling Suggestion for Predicting Damage of Complex Disasters About Vector-born Disease <i>Byung-Hoon Lee, Byung-Jin Lee, Seung-Hee Oh, Yong-Tea Lee, and Kyung-Seok Kim</i>	1
Teaching Workbench for Channel Emulation Attenuation <i>Debora M Ferreira, Eduardo Lima, Omar C Branquinho, and Leonardo Delforno</i>	4
SEC and Survival RSA Problem on EONs with Time-Varying Traffic <i>Der-Rong Din</i>	8
The RBCMLSA Problem on EONs with Flexible Transceivers <i>Der-Rong Din and Meng-Xun Zhan</i>	14
Routing and Spectrum Allocation Method to Avoid the Generation of Crosstalk and the Blocking of Lightpath Establishment in Multi-Core Fiber Networks <i>Tomotaka Kimura, Keita Goto, Kai Morita, Kouji Hirata, Yutaka Fukuchi, and Masahiro Muraguchi</i>	22
Performance Improvement of Colored Optical Packet Switching Thanks to Time Slot Sharing. <i>Amira Kamli, Tulin Atmaca, Artur Ratay, Djamel Amar, and Catherine Lepers</i>	28
Securing Tire Pressure Monitoring System <i>Kevin Daimi and Mustafa Saed</i>	32
QBAIoT: QoS Based Access for IoT Environments <i>Ahmad Khalil, Nader Mbarek, and Olivier Togni</i>	38
Sectorized Codebook Design for a Polyhedron-Based Antenna Array Structure <i>Jiyeong Yang and Wonjin Sung</i>	44
Reducing Link Failure Test Cases for Telecom Networks by Focusing on Topological Similarity <i>Megumi Shibuya, Toshihiko Kato, Teruyuki Hasegawa, and Hirozumi Yamaguchi</i>	46
The IEEE 802.11p Performance for Different Packet Length and Arrival Rate in VANETs <i>Osman Toker, A. F. M. Shahen Shah, and M.S. Ufuk Tureli</i>	52
Low-Complexity Antenna Selection for Minimizing the Power Consumption of a MIMO Base Station <i>Remi Bonnefoi, Christophe Moy, Jacques Palicot, and Amor Nafkha</i>	57
A New Clipping Function for PAPR Mitigation: The Gaussian Clipping Function <i>Jacques Palicot, Yves Louet, and Desire Guel</i>	63

Dynamic Resource Allocation and Balanced Cell Loading - a Stochastic Meanfield Control Approach <i>Abheek Saha</i>	69
PAPR and Spectral Control Procedure for OFDM Wireless Systems Using CAZAC Equalization <i>Yoshitsugu Sugai, Yushi Shirato, Tomotaka Kimura, and Masahiro Muraguchi</i>	75
Receiver Sensitivity Improvement for IoT <i>MohammadMahdi Asgharzadeh, Emil Novakov, and Ghislaine Maury</i>	81
Pulsar Signal Detection Using Hough Transform <i>Ivan Garvanov</i>	85
Fixed Complexity Soft-Output Detection Algorithm Through Exploration and Exploitation Processes <i>Bastien Trotobas and Amor Nafkha</i>	89
Pedagogical Design Principles Guided Integration of Social Media Concepts in a Hybrid Learning Environment: Analysing and Reporting Focus Group Results <i>Manal Assaad, Tiina Makela, Dimitris Pnevmatikos, and Panagiota Christodoulou</i>	94
Improvement of an Existing Microservices Architecture for an E-learning Platform in STEM Education <i>David Bauer, Benjamin Penz, Juho Makio, and Manal Assaad</i>	101
Multicast Activation Scheme based on LoRaWAN for Multicast MAC Transmission <i>Sun Hwa Lim and Kang Bok Lee</i>	110
Proposal of Power Saving Techniques for Wireless Terminals Using CAZAC-OFDM Scheme <i>Takanobu Onoda, Ryota Ishioka, and Masahiro Muraguchi</i>	115
Multinomial Distribution Based Blind Interleaver Parameters Estimation <i>Changryoul Choi and Jechang Jeong</i>	121
Actor4j: A Software Framework for the Actor Model Focusing on the Optimization of Message Passing <i>David Alessandro Bauer and Juho Makio</i>	125
Stochastic Modeling for Self-evolving Botnets in Infection Control Environments <i>Koki Hongyo, Tomotaka Kimura, Takanori Kudo, Yoshiaki Inoue, and Kouji Hirata</i>	135
Web Programming, Cloud Services and Quality of Experience (QoE) for Mobile Computing <i>Ustijana Rechkoska-Shikoska</i>	137
