Table of Contents

Studying the Impact of Minority Views in a Computational Model of Collective Sensemaking: The Role of Network Structure 1
Paul Smart

Enrichment of Cartographic Maps with the Elements of Spatial Cognition 9
Farid Karimipour and Ali Khazravi

Energy Saving Accounts for the Suppression of Sensory Detail 14
Terry Bossomaier, Lionel Barnett, Vaenthan Thiruvarudchelvan, and Herbert Jelinek

Cyber Forensics: Representing and (Im)Proving the Chain of Custody Using the Semantic Web 19
Tamer Gayed, Hakim Lounis, and Moncef Bari

Action Development and Integration in a Humanoid iCub Robot How Language Exposure and Self-Talk Facilitate Action Development 24
Tobias Leugger and Stefano Nolfi

Gaining Insights from Symbolic Regression Representations of Class Boundaries 31
Ingo Schwab and Norbert Link

Learning Cognitive Human Navigation Behaviors for Indoor Mobile Robot Navigation 37
Luz Abril Torres Mendez and Roberto Cervantes Jacobo

Cognitive Information in Business Process - Decision-Making Results 46
Andreia Pereira and Flavia Santoro

Vision-based Inspection Algorithm for Identifying the Carbide Phase State in 12CrMoV Steel 53
Alexander Tzokev, Anton Mihaylov, Tzanko Georgiev, and Irina Topalova

Indoor User Tracking with Particle Filter 59
Incheol Kim, Eunmi Choi, and Huikyung Oh

Speed Up Learning in a Test Feature Classifier Using Overlap Index Lists 63
Yoshikazu Matsuo, Takamichi Kobayashi, Hidenori Takauji, and Shuni'ichi Kaneko

Towards Cooperative Cognitive Models in Multi-Agent Systems 67
Jan Charles Lenk, Rainer Droste, Cilli Sobiech, Andreas Ludtke, and Axel Hahn

EEG-based Valence Recognition: What do we Know About the influence of Individual Specificity? 71
Timo Schuster, Sascha Gruss, Stefanie Rukavina, Steffen Walter, and Harald C. Traue

Impact of Stimulus Configuration on Steady State Visual Evoked Potentials (SSVEP) Response 77
Chi-Hsu Wu and Heba Lakany

A Basic Study for Grasping Movement on Cognitive Task 83
Shunji Shumizu, Hiroaki Inoue, and Noboru Takahashi

The Relationship between Human Brain Activity and Movement on the Spatial Cognitive Task 89
Shunji Shimizu, Hiroaki Inoue, Hiroyuki Nara, Noboru Takahashi, Fumikazu Miwakeichi, Nobuhide Hirai, Senichiro Kikuchi, Eiju Watanabe, and Satoshi Kato

EEG-controlled Table Bike for Neurorehabilitation Based on Sensorimotor-rhythm BCI 95
Jin-Chern Chiou, Sheng-Chuan Liang, Chia-Hung Yen, Chun-Jen Chien, Yung-Jiun Lin, Tien-Fu Chang, Nei-Hsin Meng, Ching-Hung Lin, and Jeng-Ren Duann

How Robust the Motor Imagery Induced EEG Sensorimotor Rhythm can be Extracted: A Test from a Cohort of Normal Subjects 98
Jeng-Ren Duann, Tien-Fu Chang, Yung-Jiun Lin, and Jin-Chern Chiou

Fundamental Study to New Evaluation Method Based on Physical and Psychological Load in Care 101
Hiroaki Inoue, Shunji Shimizu, Noboru Takahashi, Hiroyuki Nara, Takeshi Tsuruga, Fumikazu Miwakeichi, Nobuhide Hirai, Senichiro Kikuchi, Eiju Watanabe, and Satoshi Kato

Geometry of Intentionality in Neurodynamics 107
Germano Resconi and Robert Kozma

Co-adaptivity in Unsupervised Adaptive Brain-Computer Interfacing: a Simulation Approach 115
Martin Spuler, Wolfgang Rosenstiel, and Martin Bogdan

Handling of Deviations from Desired Behaviour in Hybrid Central/Self-Organising Multi-Agent Systems 122
Yaser Chaaban, Christian Muller-Schloer, and Jorg Hahner

Fuzzy Weights Representation of AHP for Inner Dependence among Alternatives 129
Shin-ichi Ohnishi and Takahiro Yamanoi

Measuring Robustness in Hybrid Central/Self-Organising Multi-Agent Systems 133
Yaser Chaaban, Christian Muller-Schloer, and Jorg Hahner

Some New Concepts in MCS Ontology for Cognitics; Permanence, Change, Speed, Discontinuity, Innate versus Learned Behavior, and More 139
Jean-Daniel Dessimoz, Pierre-Francois Gauthey, and Hayato Omori

Experiencing and Processing Time with Neural Networks 145
Michail Maniadakis and Panos Trahanias

A Predictive System for Distance Learning Based on Ontologies and Data Mining 151
Evangelia Boufardea and John Garofalakis

An Experiment in Students' Acquisition of Problem Solving Skill from Goal-Oriented Instructions 159
Matej Guid, Jana Krivec, and Ivan Bratko

Learning Long Sequences in Binary Neural Networks 165
Xiaoran Jiang, Vincent Gripon, and Claude Berrou

Extending the World to Sense and Behave: a Supportive System Focusing on the Body Coordination for Neurocognitive Rehabilitation 171
Hiroaki Wagatsuma, Marie Fukudome, Kaori Tachibana, and Kazuhiro Sakamoto
