

## Table of Contents

A Fault-Injection Prototype for Safety Assessment of V2X Communication <i>Daniel Skarin, Benjamin Vedder, Rolf Johansson, and Henrik Eriksson</i>	1
Fault-Detection Sensitivity Based Assessment of Test Sets for Safety-Relevant Software <i>Susanne Kandl and Jean-Marc Forey</i>	5
Network-Security-Policy Analysis <i>Christian Pitscheider</i>	10
Notification Support Infrastructure for Self-Adapting Composite Services <i>Erlend Andreas Gjaere, Per Hakon Meland, and Thomas Vilarinho</i>	17
A Policy-based Middleware for Self-Adaptive Distributed Systems <i>Sun Jingtao and Satoh Ichiro</i>	25
SLA Object and SLA Process Modeling using WSLA and BPM Notations, Towards defining a Generic SLA Orchestrator Framework <i>Bukhary Ikhwan Ismail, Nurliyana Muty, Mohammad Fairus Khalid, and Hong Hoe Ong</i>	32
HiPAS: High Performance Adaptive Schema Migration - Evaluation of a Self-Optimizing Database Migration <i>Hendrik Muller, Andreas Prusch, and Steffan Agel</i>	41
Evaluation of Software-Based Fault-Tolerant Techniques on Embedded OS's Components <i>Hosein Mohammadi Makrani, Amir Mahdi Hosseini Monazzah, Hamed Farbeh, and Seyed Ghassem Miremadi</i>	51
