

Table of Contents

Geocoding with OpenStreetMap Data <i>Konstantin Clemens</i>	1
Using Geosynchronization for Incremental Update of INSPIRE Service Databases <i>Lassi Lehto, Eero Hietanen, and Pekka Latvala</i>	3
PABench: Designing a Taxonomy and Implementing a Benchmark for Spatial Entity Matching <i>Bilal Berjawi, Fabien Duchateau, Franck Favetta, Maryvonne Miquel, and Robert Laurini</i>	7
Development of a System Prototype for Insurance Rate Information Based on Natural Disaster Risk <i>Jihun Kang, Insu Lee, and Jung Ok Kim</i>	17
Emergency Response Plan Spatial Management For Oil And Electric Network <i>Ayman Ahmed, Ahmad Al Kandari, and Ahmed Abd Al Salam</i>	19
Temporally Transformed Map Animation for Visual Data Analysis <i>Salla Multimaki and Paula Ahonen-Rainio</i>	25
On Maxmin Active Range Problem for Weighted Consistent Dynamic Map Labeling <i>Xiao Zhang, Sheung-Hung Poon, Minming Li, and Victor C.S. Lee</i>	32
A Dynamic IT Model for Territorial Integrated Management <i>Maria Jose Lucena e Vale, Bruno M. Meneses, Rui Reis, Raquel Saraiva, Jesus Villegas, and Mariano Cruz</i>	38
Implementations of Spatio-Temporal Data Structure for Geographic Information System <i>Kazuaki Iwamura</i>	43
A Study on the Insurance Premium Rate Map Considering the Natural Disaster Risks in Korea <i>Jung Ok Kim, Junseok Lee, and Jihun Kang</i>	51
Using GIS for Searching Medieval Texts – Beginnings of a Project <i>Tomas Klimek</i>	53
Creating Knowledge-based Dynamical Visualisation and Computation <i>Claus-Peter Ruckemann</i>	56
Geographic Data Modeling for NoSQL Document-Oriented Databases <i>Wagner Boaventura Filho, Harley Vera Olivera, Maristela Holanda, and Aleteia Araujo</i>	63
A Segmentation-based Approach for Improving the Accuracy of Polygon Data	69

Alexey Noskov and Yerach Doytsher

Inferring Urban Population Distribution from GSM data: An Experimental Case Study 75
Hisham Raslan and Ahmed Elragal

Sensors Placement in Urban Environments Using Genetic Algorithms 82
Oren Gal and Yerach Doytsher

IQAr: A Web Based GIS for Air Quality Monitoring in Real-time 88
Matheus Rosendo, Rafael Geha Serta, Yuri Arnold Gruber, and Fabiano Scheer Hainosz

Mining Spatial and Temporal Movement Patterns of Passengers on Bus Networks 94
Chunjie Zhou, Pengfei Dai, Fusheng Wang, and Renpu Li

Geoprocessing Applied to Open Government Data 100
Daniel Leite, Julio Rocha, Claudio Baptista, Ana Falcao, and Hugo Figueiredo

Data Concretization States as Metadata of Parameterized Regional Futures in a WebSDSS Development Context 106
Rico Vogel, Marco Neubert, and Axel Sauer

A new nD Temporal Geodata Management Approach using GML 110
Martin Hoppen, Michael Schluse, Juergen Rossmann, and Christoph Averdung

Personalized Trajectory Reconstruction Problem with low-sampling data 117
Edison Ospina and Francisco Moreno

A Package for the Homogenisation of Climate Data Using Geostatistical Simulation 123
Julio Caineta, Sara Ribeiro, Roberto Henriques, and Ana C Costa

Towards the Use of Crowdsourced Volunteered Meteorological Data for Forest Fire Monitoring 127
Sagi Dalyot and Shay Sosko
