

ACCSE 2023

Forward

The Eighth International Conference on Advances in Computation, Communications and Services (ACCSE 2023), held between June 26th and June 30th, 2023, continued a series of events a series of events targeting the progress made in computation, communication, and services on various areas in terms of theory, practices, novelty, and impact. Current achievements, potential drawbacks, and possible solutions are aspects intended to bring together academia and industry players.

The rapid increase in computation power and affordable memory/storage led to advances in almost all the technology and services domains. The outcome made it possible advances in other emerging areas, like Internet of Things, Cloud Computing, Data Analytics, Smart Cities, Mobility and Cyber-Systems, to enumerate just a few of them.

We take here the opportunity to warmly thank all the members of the ACCSE 2023 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to ACCSE 2023. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the ACCSE 2023 organizing committee for their help in handling the logistics of this event.

We hope that ACCSE 2023 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of computation, communications, and services.

ACCSE 2023 Chairs

ACCSE 2023 Publicity Chairs

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain

José Miguel Jiménez, Universitat Politecnica de Valencia, Spain
