

ACHI 2026

Forward

The Nineteenth International Conference on Advances in Computer-Human Interactions (ACHI 2026), held between May 24, 2026, and May 28, 2026, in Venice, Italy, continued a series of events addressing the most recent achievements and future trends in human interactions with increasingly complex systems. Adaptive and knowledge-based user interfaces, universal accessibility, human-robot interaction, agent-driven human computer interaction, and sharable mobile devices are a few of these trends. ACHI 2026 also brought a suite of specific domain applications, such as e-learning, social, medicine, education, and engineering.

We take here the opportunity to warmly thank all the members of the ACHI 2026 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank the authors who dedicated time and effort to contribute to ACHI 2026. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the ACHI 2026 organizing committee for their help in handling the logistics of this event.

We hope that ACHI 2026 was a successful international forum for the exchange of ideas and results between academia and industry for the promotion of progress in the area of human-computer interactions.
