

CLOUD COMPUTING 2022

Forward

The Thirteenth International Conference on Cloud Computing, GRIDs, and Virtualization (CLOUD COMPUTING 2022), held on April 24 - 28, 2022, continued a series of events targeted to prospect the applications supported by the new paradigm and validate the techniques and the mechanisms. A complementary target was to identify the open issues and the challenges to fix them, especially on security, privacy, and inter- and intra-clouds protocols.

Cloud computing is a normal evolution of distributed computing combined with Service-oriented architecture, leveraging most of the GRID features and Virtualization merits. The technology foundations for cloud computing led to a new approach of reusing what was achieved in GRID computing with support from virtualization.

The conference had the following tracks:

- Cloud computing
- Computing in virtualization-based environments
- Platforms, infrastructures and applications
- Challenging features
- New Trends
- Grid networks, services and applications

Similar to the previous edition, this event attracted excellent contributions and active participation from all over the world. We were very pleased to receive top quality contributions.

We take here the opportunity to warmly thank all the members of the CLOUD COMPUTING 2022 technical program committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to CLOUD COMPUTING 2022. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the CLOUD COMPUTING 2022 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that CLOUD COMPUTING 2022 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of cloud computing, GRIDs and virtualization. We also hope that Barcelona provided a pleasant environment during the conference and everyone saved some time to enjoy the historic charm of the city

CLOUD COMPUTING 2022 Steering Committee

Carlos Becker Westphall, Federal University of Santa Catarina, Brazil

Yong Woo Lee, University of Seoul, Korea

Bob Duncan, University of Aberdeen, UK

Alex Sim, Lawrence Berkeley National Laboratory, USA

Sören Frey, Daimler TSS GmbH, Germany

Andreas Aßmuth, Ostbayerische Technische Hochschule (OTH) Amberg-Weiden, Germany

Uwe Hohenstein, Siemens AG, Germany

Magnus Westerlund, Arcada, Finland

CLOUD COMPUTING 2022 Publicity Chair

Lorena Parra, Universitat Politecnica de Valencia, Spain

Javier Rocher, Universitat Politècnica de València, Spain
