

CTRQ 2025

Forward

The Eighteenth International Conference on Communication Theory, Reliability, and Quality of Service (CTRQ 2025), held between May 18-22, 2025 in Nice, France, continued a series of events focusing on the achievements in communication theory with respect to reliability and quality of service.

The processing and transmission speed and increasing memory capacity might be a satisfactory solution on the resources needed to deliver ubiquitous services, under guaranteed reliability and satisfying the desired quality of service. Successful deployment of communication mechanisms guarantees decent network stability and offers reasonable control on the quality of service expected by the end users. Recent advances on communication speed, hybrid wired/wireless, network resiliency, delay-tolerant networks and protocols, signal processing and so forth asked for revisiting some aspects of the fundamentals in communication theory. Mainly network and system reliability and quality of service are those that affect the maintenance procedures, on the one hand, and user satisfaction on service delivery, on the other hand. Reliability assurance and guaranteed quality of services require particular mechanisms that deal with dynamics of system and network changes, as well as with changes in user profiles. The advent of content distribution, IPTV, video-on-demand and other similar services accelerate the demand for reliability and quality of service.

We take here the opportunity to warmly thank all the members of the CTRQ 2025 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to CTRQ 2025. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the CTRQ 2025 organizing committee for their help in handling the logistics of this event.

We hope that CTRQ 2025 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the areas of Communication Theory, Reliability, and Quality of Service. We also hope that Nice provided a pleasant environment during the conference and everyone saved some time to enjoy the historic charm of the city

CTRQ 2025 Chairs

CTRQ Steering Committee

Kiran Makhijani, FutureWei, USA
Ali Jalooli, California State University at Dominguez Hills, USA
Costas Vassilakis, University of the Peloponnese – Tripoli, Greece

CTRQ Publicity Chairs

José Miguel Jiménez, Universitat Politècnica de Valencia, Spain
Francisco Javier Díaz Blasco, Universitat Politècnica de València, Spain
Ali Ahmad, Universitat Politècnica de València, Spain
Laura Garcia, Universidad Politécnica de Cartagena, Spain
Sandra Viciano Tudela, Universitat Politècnica de Valencia, Spain
