

# ENERGY 2026

## Foreword

The Sixteenth International Conference on Smart Grids, Green Communications and IT Energy-aware Technologies (ENERGY 2026), held between March 8 - 12, 2026, continued the event considering Green approaches for Smart Grids and IT-aware technologies. It addressed fundamentals, technologies, hardware and software needed support, and applications and challenges.

There is a perceived need for a fundamental transformation in IP communications, energy-aware technologies and the way all energy sources are integrated. This is accelerated by the complexity of smart devices, the need for special interfaces for an easy and remote access, and the new achievements in energy production. Smart Grid technologies promote ways to enhance efficiency and reliability of the electric grid, while addressing increasing demand and incorporating more renewable and distributed electricity generation. The adoption of data centers, penetration of new energy resources, large dissemination of smart sensing and control devices, including smart home, and new vehicular energy approaches demand a new position for distributed communications, energy storage, and integration of various sources of energy.

We take here the opportunity to warmly thank all the members of the ENERGY 2026 Technical Program Committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to ENERGY 2026. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the ENERGY 2026 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that ENERGY 2026 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the fields of smart grids, green communications and IT energy-aware technologies.

We are convinced that the participants found the event useful and communications very open. We also hope that Valencia provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful city.

### **ENERGY 2026 Chairs:**

#### **ENERGY 2026 Steering Committee**

Eric MSP Veith, Carl von Ossietzky University – Oldenburg, Germany  
Dragan Obradovic, Siemens - Corporate Technology, Munich, Germany  
Mark Apperley, University of Waikato, New Zealand  
Michael Negnevitsky, University of Tasmania, Australia  
Vivian Sultan, California State University Los Angeles, USA  
Steffen Fries, Siemens, Germany  
Philip Odonkor, Stevens Institute of Technology, USA

#### **ENERGY 2026 Publicity Chairs**

Francisco Javier Díaz Blasco, Universitat Politècnica de València, Spain  
Ali Ahmad, Universitat Politècnica de València, Spain

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain  
José Miguel Jiménez, Universitat Politecnica de Valencia, Spain
