

GEOProcessing 2026

Forward

The Eighteenth International Conference on Advanced Geographic Information Systems, Applications, and Services (GEOProcessing 2026), held between May 24, 2026, and May 28, 2026, in Venice, Italy, continued a series of events addressing various aspects of managing geographical information and web services.

The goal of the GEOProcessing 2026 conference was to bring together researchers from the academia and practitioners from the industry in order to address fundamentals of advances in geographic information systems and the new applications related to them using Web Services. Such systems can be used for assessment, modeling, and prognosis of emergencies.

We take here the opportunity to warmly thank all the members of the GEOProcessing 2026 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank the authors who dedicated time and effort to contribute to GEOProcessing 2026. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the GEOProcessing 2026 organizing committee for their help in handling the logistics of this event.

We hope that GEOProcessing 2026 was a successful international forum for the exchange of ideas and results between academia and industry for the promotion of progress in the field of geographical information systems, applications, and services.
