GLOBAL HEALTH 2017

Forward

The Sixth International Conference on Global Health Challenges (GLOBAL HEALTH 2017), held between November 12 - 16, 2017, in Barcelona, Spain, continued a series of events taking a global perspective on population health, from national to cross-country approaches, multiplatform technologies, from drug design to medicine accessibility, everything under mobile, ubiquitous, and personalized characteristics of new age population.

Recent advances in technology and computational science influenced a large spectrum of branches in approaching population health. Despite significant progresses, many challenges exist, including health informatics, cross-country platforms interoperability, system and laws harmonization, protection of health data, practical solutions, accessibility to health services, and many others. Along with technological progress, personalized medicine, ambient assistance and pervasive health complement patient needs. A combination of classical and information-driven approach is developing now, where diagnosis systems, data protection mechanisms, remote assistance and hospital-processes are converging.

The event was very competitive in its selection process and very well perceived by the international scientific and industrial communities. As such, it has attracted excellent contributions and active participation from all over the world. We were very pleased to receive a large number of top quality contributions.

The conference had the following tracks:
- Mechanisms and features
- Application-oriented analytics
- Fundamentals for data analytics
- Healthcare Information and Management Systems
- PAPHOS

We take here the opportunity to warmly thank all the members of the GLOBAL HEALTH 2017 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to GLOBAL HEALTH 2017. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the GLOBAL HEALTH 2017 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that GLOBAL HEALTH 2017 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of global health challenges.
We also hope that Barcelona, Spain, provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

GLOBAL HEALTH 2017 Chairs

GLOBAL HEALTH Steering Committee

Hassan Khachfe, Lebanese International University, Lebanon
Anthony Glascock, Drexel University - Philadelphia, USA
Shunji Shimizu, Kyushu University Hospital, Japan
Matthieu-P. Schapranow, Hasso Plattner Institute, Germany
Chun-Hsi Huang, University of Connecticut, USA
Vladislav Rajkovič, University of Maribor, Slovenia
Carsten Röcker, Fraunhofer Application Center Industrial Automation (IOSB-INA), Germany

GLOBAL HEALTH Technology/Research Advisory Committee

Liang Zhan, University of Wisconsin-Stout, USA
Flora Malamateniou, University of Piraeus, Greece
Da-Wei Wang, Institute of Information Science | Academia Sinca, Taiwan
Sten Hanke, IPN Instituto Pedro Nunes, Portugal | AIT Austrian Institute of Technology GmbH, Austria
Miki Sirola, Aalto University, Finland
Liangjiang Wang, Clemson University - Greenwood, USA
