ICIMP 2025

Forward

The Twentieth International Conference on Internet Monitoring and Protection (ICIMP 2025), held between April 6th, 2025, and April 10th, 2025, in Valencia, Spain, continued a series of special events targeting security, performance, vulnerabilities in Internet, as well as disaster prevention and recovery.

We take here the opportunity to warmly thank all the members of the ICIMP 2025 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to ICIMP 2025. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the ICIMP 2025 organizing committee for their help in handling the logistics of this event.

We hope that ICIMP 2025 was a successful international forum for the exchange of ideas and results between academia and industry for the promotion of progress in the area of Internet monitoring and protection.
