

ICSEA 2025

Forward

The Twentieth International Conference on Software Engineering Advances (ICSEA 2025), held on September 28 – October 1, 2025 in Lisbon, Portugal, continued a series of events covering a broad spectrum of software-related topics.

The conference covered fundamentals on designing, implementing, testing, validating and maintaining various kinds of software. The tracks treated the topics from theory to practice, in terms of methodologies, design, implementation, testing, use cases, tools, and lessons learnt. The conference topics covered classical and advanced methodologies, open source, agile software, as well as software deployment and software economics and education.

The conference had the following tracks:

- Advances in fundamentals for software development
- Advanced mechanisms for software development
- Advanced design tools for developing software
- Software engineering for service computing (SOA and Cloud)
- Advanced facilities for accessing software
- Software performance
- Software security, privacy, safeness
- Advances in software testing
- Specialized software advanced applications
- Web Accessibility
- Open source software
- Agile and Lean approaches in software engineering
- Software deployment and maintenance
- Software engineering techniques, metrics, and formalisms
- Software economics, adoption, and education
- Business technology
- Improving productivity in research on software engineering
- Trends and achievements

Similar to the previous edition, this event continued to be very competitive in its selection process and very well perceived by the international software engineering community. As such, it is attracting excellent contributions and active participation from all over the world. We were very pleased to receive a large amount of top quality contributions.

We take here the opportunity to warmly thank all the members of the ICSEA 2025 technical program committee as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and efforts to contribute to the ICSEA 2025. We truly believe that thanks to all these efforts, the final conference program consists of top quality contributions.

This event could also not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the ICSEA 2025 organizing committee for their help in handling the logistics and for their work that is making this professional meeting a success.

We hope the ICSEA 2025 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in software engineering research. We also hope that Lisbon provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful city

ICSEA 2025 Steering Committee

Herwig Manaert, University of Antwerp, Belgium

Radek Koci, Brno University of Technology, Czech Republic

Sébastien Salva, University of Clermont Auvergne | LIMOS Laboratory | CNRS, France

José Carlos Metrôlho, Polytechnic Institute of Castelo Branco, Portugal

Luigi Lavazza, Università dell'Insubria – Varese, Italy

Hironori Washizaki, Waseda University / National Institute of Informatics / SYSTEM INFORMATION, Japan

Roy Oberhauser, Aalen University, Germany

Simona Vasilache, University of Tsukuba, Japan

ICSEA 2025 Publicity Chair

Lorena Parra Boronat, Universidad Politécnica de Madrid, Spain

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain

Jose Miguel Jimenez, Universitat Politecnica de Valencia, Spain
