INTERNET 2011

Foreword

The Third International Conference on Evolving Internet [INTERNET 2011], held between June 19 and 24, 2011, in Luxembourg, dealt with challenges raised by evolving Internet making use of the progress in different advanced mechanisms and theoretical foundations. The gap analysis aimed at mechanisms and features concerning the Internet itself, as well as special applications for software defined radio networks, wireless networks, sensor networks, or Internet data streaming and mining.

Originally designed in the spirit of interchange between scientists, the Internet reached a status where large-scale technical limitations impose rethinking its fundamentals. This refers to design aspects (flexibility, scalability, etc.), technical aspects (networking, routing, traffic, address limitation, etc), as well as economics (new business models, cost sharing, ownership, etc.). Evolving Internet poses architectural, design, and deployment challenges in terms of performance prediction, monitoring and control, admission control, extendibility, stability, resilience, delay-tolerance, and interworking with the existing infrastructures or with specialized networks.

We take here the opportunity to warmly thank all the members of the INTERNET 2011 Technical Program Committee, as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and efforts to contribute to INTERNET 2011. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations, and sponsors. We are grateful to the members of the INTERNET 2011 organizing committee for their help in handling the logistics and for their work to make this professional meeting a success.

We hope that INTERNET 2011 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the area of the evolving Internet.

We are convinced that the participants found the event useful and communications very open. We also hope the attendees enjoyed the historic charm Luxembourg.

INTERNET 2011 Chairs:

Eugen Borcoci, University "Politehnica" Bucharest, Romania
Christian Callegari, University of Pisa, Italy
Dirceu Cavendish, Kyushu Institute of Technology, Japan
Emmanuel Chaput, ENSEEIHT / IRIT-CNRS, France
Danny De Vleeschauwer, Alcaltel-Lucent Bell Labs - Antwerp, Belgium
Jerome Galtier, Orange Labs, France

Terje Jensen, Telenor Corporate Development - Fornebu / Norwegian University of Science and Technology - Trondheim, Norway
Jaime Lloret Mauri, Polytechnic University of Valencia, Spain
Robert van der Mei, Centrum Wiskunde & Informatica, The Netherlands
Massimo Villari, University of Messina, Italy
Krzysztof Walkowiak, Wroclaw University of Technology, Poland
Sabine Wittevrongel, Ghent University, Belgium
Tingyao Wu, Alcatel-Lucent - Antwerpen, Belgium
Mark Yampolskiy, Leibniz-Rechenzentrum (LRZ) - Garching, Germany
Abdulrahman Yarali, Murray State University, USA
Vladimir Zaborovsky, Technical University - Saint-Petersburg, Russia
