

INTERNET 2024

Forward

The Sixteenth International Conference on Evolving Internet (INTERNET 2024), held between March 10th and March 14th, 2024, continued a series of international events focusing on challenges raised by the evolving Internet, making use of the progress in different advanced mechanisms and theoretical foundations. The gap analysis aimed at mechanisms and features concerning the Internet itself, as well as special applications for software defined radio networks, wireless networks, sensor networks, or Internet data streaming and mining.

Originally designed in the spirit of interchange between scientists, the Internet reached a status where large-scale technical limitations impose rethinking its fundamentals. This refers to design aspects (flexibility, scalability, etc.), technical aspects (networking, routing, traffic, address limitation, etc.), as well as economics (new business models, cost sharing, ownership, etc.). The evolving Internet poses architectural, design, and deployment challenges in terms of performance prediction, monitoring and control, admission control, extendibility, stability, resilience, delay-tolerance, and interworking with the existing infrastructures or with specialized networks.

We take here the opportunity to warmly thank all the members of the INTERNET 2024 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to INTERNET 2024. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the INTERNET 2024 organizing committee for their help in handling the logistics of this event.

We hope that INTERNET 2024 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the area of the evolving Internet.

INTERNET 2024 Chairs

INTERNET 2024 Steering Committee

Renwei (Richard) Li, Future Networks, Futurewei, USA

Eugen Borcoci, University "Politehnica" of Bucharest (UPB), Romania

Terje Jensen, Telenor, Norway

Przemyslaw (Przemek) Pochec, University of New Brunswick, Canada

Parimala Thulasiraman, University of Manitoba – Winnipeg, Canada

Dirceu Cavendish, Kyushu Institute of Technology, Japan

INTERNET 2024 Publicity Chairs

José Miguel Jiménez, Universitat Politecnica de Valencia, Spain

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain
