The Twelfth International Conference on Sensor Technologies and Applications (SENSORCOMM 2018), held between September 16, 2018 and September 20, 2018 in Venice, Italy, continued a series of events covering related topics on theory and practice on wired and wireless sensors and sensor networks.

Sensors and sensor networks have become a highly active research area because of their potential of providing diverse services to broad range of applications, not only on science and engineering, but equally importantly on issues related to critical infrastructure protection and security, health care, the environment, energy, food safety, and the potential impact on the quality of all areas of life.

Sensor networks and sensor-based systems support many applications today on the ground. Underwater operations and applications are quite limited by comparison. Most applications refer to remotely controlled submersibles and wide-area data collection systems at a coarse granularity.

In wireless sensor and micro-sensor networks, energy consumption is a key factor for the sensor lifetime and accuracy of information. Protocols and mechanisms have been proposed for energy optimization considering various communication factors and types of applications. Conserving energy and optimizing energy consumption are challenges in wireless sensor networks, requiring energy-adaptive protocols, self-organization, and balanced forwarding mechanisms.

We take here the opportunity to warmly thank all the members of the SENSORCOMM 2018 technical program committee, as well as all the reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated their time and effort to contribute to SENSORCOMM 2018. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

We also gratefully thank the members of the SENSORCOMM 2018 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that SENSORCOMM 2018 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of sensor technologies and applications. We also hope that Venice, Italy provided a pleasant environment during the conference and everyone saved some time to enjoy the unique charm of the city.

SENSORCOMM 2018 Chairs

SENSORCOMM Steering Committee
Sergey Yurish, IFSA, Spain
Brendan O’Flynn, Tyndall National Institute | University College Cork, Ireland
Jaime Lloret Mauri, Polytechnic University of Valencia, Spain
Elad Schiller, Chalmers University of Technology, Sweden
Jiannan Zhai, Florida Atlantic University, USA
Stefano Mariani, Politecnico di Milano, Italy
Manuela Vieira, ISEL-CTS/UNINOVA, Portugal
Tadashi Okoshi, Keio University, Japan
Jerker Delsing, Lulea University of Technology, Sweden

SENSORCOMM Industry/Research Advisory Committee
Shaohan Hu, IBM Research, USA
