SERVICE COMPUTATION 2021

Forward

The Thirteenth International Conferences on Advanced Service Computing (SERVICE COMPUTATION 2021), held on April 18 - 22, 2021, continued a series of events targeting computation on different facets.

The ubiquity and pervasiveness of services, as well as their capability to be context-aware with (self-) adaptive capacities posse challenging tasks for services orchestration, integration, and integration. Some services might require energy optimization, some might require special QoS guarantee in a Web-environment, while others a certain level of trust. The advent of Web Services raised the issues of self-announcement, dynamic service composition, and third party recommenders. Society and business services rely more and more on a combination of ubiquitous and pervasive services under certain constraints and with particular environmental limitations that require dynamic computation of feasibility, deployment and exploitation.

The conference had the following tracks:

- Service innovation, evaluation and delivery
- Service quality
- Challenges
- Advanced Analysis of Service Compositions

Similar to the previous edition, this event attracted excellent contributions and active participation from all over the world. We were very pleased to receive top quality contributions.

We take here the opportunity to warmly thank all the members of the SERVICE COMPUTATION 2021 technical program committee, as well as the numerous reviewers. The creation of a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to SERVICE COMPUTATION 2021. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the SERVICE COMPUTATION 2021 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope SERVICE COMPUTATION 2021 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of computation.

SERVICE COMPUTATION 2021 Steering Committee

Paul Humphreys, Ulster Business School/University of Ulster, UK
Arne Koschel, Hochschule Hannover, Germany
Annett Laube, Bern University of Applied Sciences (BUAS), Switzerland
Eugen Borcoci, University "Politehnica" of Bucharest, Romania
Andreas Hausotter, Hochschule Hannover - University of Applied Sciences and Arts, Hannover, Germany

SERVICE COMPUTATION 2021 Publicity Chair

Jose Luis García, Universitat Politecnica de Valencia, Spain
Lorena Parra, Universitat Politecnica de Valencia, Spain

SERVICE COMPUTATION 2021 Industry/Research Advisory Committee

Steffen Fries, Siemens Corporate Technology - Munich, Germany
Matthias Olzmann, noventum consulting GmbH - Münster, Germany
Rong N. Chang, IBM T.J. Watson Research Center, USA
Jan Porekar, SETCCE, Slovenia
Bernhard Hollunder, Hochschule Furtwangen University - Furtwangen, Germany
