SERVICE COMPUTATION 2023

Forward

The Fifteenth International Conferences on Advanced Service Computing (SERVICE COMPUTATION 2023), held on June 26 - 30, 2023, continued a series of events targeting computation on different facets.

The ubiquity and pervasiveness of services, as well as their capability to be context-aware with (self-) adaptive capacities posse challenging tasks for services orchestration, integration, and integration. Some services might require energy optimization, some might require special QoS guarantee in a Web-environment, while others a certain level of trust. The advent of Web Services raised the issues of self-announcement, dynamic service composition, and third party recommenders. Society and business services rely more and more on a combination of ubiquitous and pervasive services under certain constraints and with particular environmental limitations that require dynamic computation of feasibility, deployment and exploitation.

Similar to the previous edition, this event attracted excellent contributions and active participation from all over the world. We were very pleased to receive top quality contributions.

We take here the opportunity to warmly thank all the members of the SERVICE COMPUTATION 2023 technical program committee, as well as the numerous reviewers. The creation of a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to SERVICE COMPUTATION 2023. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the SERVICE COMPUTATION 2023 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope SERVICE COMPUTATION 2023 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the area of computation. We also hope that Nice provided a pleasant environment during the conference and everyone saved some time to enjoy this beautiful city.

SERVICE COMPUTATION 2023 Steering Committee

Paul Humphreys, Ulster Business School/University of Ulster, UK
Arne Koschel, Hochschule Hannover, Germany
Annett Laube, Bern University of Applied Sciences (BUAS), Switzerland
Eugen Borcoci, University "Politehnica" of Bucharest, Romania

Andreas Hausotter, Hochschule Hannover - University of Applied Sciences and Arts, Hannover, Germany
Ozgu Can, Ege University, Turkey

SERVICE COMPUTATION 2023 Publicity Chair

José Miguel Jiménez, Universitat Politecnica de Valencia, Spain
Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain
