

SIMUL 2025

Forward

The Seventeenth International Conference on Advances in System Simulation (SIMUL 2025), held on September 28 – October 1, 2025 in Lisbon, Portugal, continued a series of events focusing on advances in simulation techniques and systems providing new simulation capabilities.

While different simulation events are already scheduled for years, SIMUL 2025 identified specific needs for ontology of models, mechanisms, and methodologies in order to make easy an appropriate tool selection. With the advent of Web Services and WEB 3.0 social simulation and human-in simulations bring new challenging situations along with more classical process simulations and distributed and parallel simulations. An update on the simulation tool considering these new simulation flavors was aimed at, too.

The conference provided a forum where researchers were able to present recent research results and new research problems and directions related to them. The conference sought contributions to stress-out large challenges in scale system simulation and advanced mechanisms and methodologies to deal with them. The accepted papers covered topics on social simulation, transport simulation, simulation tools and platforms, simulation methodologies and models, and distributed simulation.

We welcomed technical papers presenting research and practical results, position papers addressing the pros and cons of specific proposals, such as those being discussed in the standard forums or in industry consortiums, survey papers addressing the key problems and solutions on any of the above topics, short papers on work in progress, and panel proposals.

We take here the opportunity to warmly thank all the members of the SIMUL 2025 technical program committee as well as the numerous reviewers. The creation of such a broad and high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and efforts to contribute to the SIMUL 2025. We truly believe that thanks to all these efforts, the final conference program consists of top quality contributions.

This event could also not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the SIMUL 2025 organizing committee for their help in handling the logistics and for their work that is making this professional meeting a success. We gratefully appreciate to the technical program committee co-chairs that contributed to identify the appropriate groups to submit contributions.

We hope the SIMUL 2025 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in simulation research. We also hope that Lisbon provided a pleasant environment during the conference and everyone saved some time for exploring this beautiful city

SIMUL 2025 Steering Committee

Carlo Simon, Hochschule Worms - University of Applied Sciences, Germany

Frank Herrmann, University of Applied Sciences Regensburg, Germany

Sibylle Fröschle, TUHH - Hamburg University of Technology, Germany

SIMUL 2025 Publicity Chair

Lorena Parra Boronat, Universidad Politécnica de Madrid, Spain

Sandra Viciano Tudela, Universitat Politecnica de Valencia, Spain

Jose Miguel Jimenez, Universitat Politecnica de Valencia, Spain
