WEB 2015

Forward

Third International Conference on Building and Exploring Web Based Environments (WEB 2015), held between May 24-29, 2015 in Rome, Italy, continued a series of events focusing on web-related theoretical and practical aspects, identifying challenges for building web-based useful services and applications, and effectively extracting and integrating knowledge from the Web, enterprise data, and social media.

The Web has changed the way we share knowledge, the way we design distributed services and applications, the way we access large volumes of data, and the way we position ourselves with our peers.

Successful exploitation of web-based concepts by web communities lies on the integration of traditional data management techniques and semantic information into web-based frameworks and systems.

The conference had the following tracks:

- Services and applications
- Features

We take here the opportunity to warmly thank all the members of the WEB 2015 technical program committee, as well as the numerous reviewers. The creation of such a high quality conference program would not have been possible without their involvement. We also kindly thank all the authors that dedicated much of their time and effort to contribute to WEB 2015. We truly believe that, thanks to all these efforts, the final conference program consisted of top quality contributions.

Also, this event could not have been a reality without the support of many individuals, organizations and sponsors. We also gratefully thank the members of the WEB 2015 organizing committee for their help in handling the logistics and for their work that made this professional meeting a success.

We hope that WEB 2015 was a successful international forum for the exchange of ideas and results between academia and industry and to promote further progress in the field of Web-based environments. We also hope that Rome, Italy provided a pleasant environment during the conference and everyone saved some time to enjoy the historic beauty of the city.

WEB 2015 Chairs

WEB 2015 Advisory Chairs

Irina Astrova, Tallinn University of Technology, Estonia
Zhe Wu, Oracle, USA
Mariusz Trzaska, Polish-Japanese Institute of Information Technology, Poland

Maria Del Pilar Angeles, Universidad Nacional Autonoma de Mexico - Del Coyoacan, Mexico
Davide Rossi, University of Bologna, Italy
Adriana Martin, National University of Austral Patagonia (UNPA), Argentina
