

Table of Contents

Evaluating Hyperparameter Selection Techniques for the Ratio-Coupled Loss Function <i>Austin B. Schmidt, Pujan Pokhrel, Md Meftahul Ferdaus, Elias Ioup, Mahdi Abdelguerfi, and Julian Simeonov</i>	1
Multi-Source Constrained Machine Learning for Oceanic Parameters Forecasting <i>Pujan Pokhrel, Austin B. Schmidt, Md Meftahul Ferdaus, Elias Ioup, Julian Simeonov, and Mahdi Abdelguerfi</i>	8
Simulation-Based Study of Propulsion and Control of an AUV in Current-Affected Environments <i>Aymen Mefti, Mahfoudh Cerdoun, and Djahida Boucetta</i>	16
Operationalizing and Testing Machine Learning Models for Acoustic Target Classification <i>Nils Olav Handegard, Silje Smith-Johnsen, Arne Johannes Holmin, Cristian Munos Mas, Ingrid Utseth, and Daniel Dondorp</i>	23
Semi-Supervised Object Detection for Marine Monitoring using Temporal Information <i>Viljar Holm Elvevoll, Kim Tallaksen Halvorsen, and Ketil Malde</i>	27
Machine Learning Using Physics-Based Backscattering Modeling for Acoustic Identification of Mesopelagic Organisms <i>Sander Andre Berg Marx, Babak Khodabandeloo, and Ketil Malde</i>	32
Accelerating HEC-RAS: A Recurrent Neural Operator for Rapid River Forecasting <i>Edward Holmberg, Pujan Pokhrel, Elias Ioup, Ken Pathak, Steven Sloan, Kendall Niles, Jay Ratcliff, Maik Flanagan, Christian Guetl, Julian Simeonov, and Mahdi Abdelguerfi</i>	38
Integrated design and field validation of MoBI: An Intelligent Buoy for environmental data acquisition <i>Alessio Chirigu, Alberto Mancosu, Sara Pinna, Matteo Anedda, Mariella Sole, and Daniele Giusto</i>	46
