

Table of Contents

The Domain Name Life Cycle as an Attack Surface: Systematic Threat Mapping and Defense Recommendations <i>Thomas Fritzler and Michael Massoth</i>	1
Attesting the Trustworthiness of a Credential Issuer <i>Rainer Falk and Steffen Fries</i>	8
Selecting Cybersecurity Requirements: Effects of LLM Use and Professional Software Development Experience <i>Damjan Fujs, Damjan Vavpotic, Tomaz Hovelja, and Marko Pozenel</i>	13
From Stakeholder Needs to Secure Digital Twin Services: Critical Infrastructure Use Cases within the INTACT Framework <i>Ilinca-Laura Burdulea, Sonika Gogineni, Stamatios Kostopoulos, Evangelos K. Markakis, Kyriakos N. Manganaris, and Fotis I. Lazarakis</i>	18
Proposal and Implementation of a Security Enhancement Method using Route Hopping MTD for Mesh Networks <i>Yuto Ikeda and Hiroshi Koide</i>	24
Integrating Cybersecurity and Digital Marketing Effectiveness: Developing a cohesive framework for SME resilience <i>Kathy-Ann Fletcher and Nicole Carle</i>	31
Temporary Identification Management System Using UNIX Time for IoT Device Privacy Protection <i>Koki Mizoguchi, Somchart Fugkeaw, Masahito Kumazaki, Hirokazu Hasegawa, and Hiroki Takakura</i>	37
A File Access Permission Management System to Realize Task Transfer during Cyber Attacks <i>Hidetoshi Kawai, Masahito Kumazaki, Hirokazu Hasegawa, Hiroki Takakura, and Masahiko Kato</i>	43
A Privacy-preserving Video Processing Pipeline <i>Gabor Gyorgy Gulyas and Gergely Erdodi</i>	50
Contributions to Methodologies to Improve Sensor Data Quality of Cyber Physical Production Systems Through Digitalisation: A Use Case Approach <i>Martin Zinner, Hajo Wiemer, Kim Feldhoff, Peter Meschke, and Steffen Ihlenfeldt</i>	55
