

Table of Contents

| | |
|---|----|
| A Simulation Model for Transport in a Grid-based Manufacturing System <i>Leo van Moergestel, Erik Puik, Daniel Telgen, Mathijs Kuijl, Bas Alblas, Jaap Koelewijn, and John-Jules Meyer</i> | 1 |
| Triggering Solar-Powered Vehicle Activated Signs using Self Organising Maps with K-means <i>Diala Jomaa, Siril Yella, and Mark Dougherty</i> | 8 |
| Analytical Network Process for the On-line Dispatching <i>Boris Davydov, Vsevolod Kuzmitskiy, and Andrey Serenko</i> | 15 |
| Constructing Autonomous Multi-Robot System <i>Nikola Serbedzija</i> | 19 |
| Fuzzy Logic Control for Gaze-Guided Personal Assistance Robots <i>Carl A. Nelson</i> | 25 |
| Establishing a Lightweight Communicative Multiagent Java Framework <i>Braxton McCraw, Justin Ruger, Roberto Flores, and Robert C. Kremer Robert C. Kremer</i> | 29 |
| Comparison of DEAS and GA for Sensitivity Optimization in MEMS Gyroscope <i>Hyunhak Cho, Moonho Park, Jaeyong Kim, and Sungshin Kim</i> | 33 |
| The Concept of Attack Surface Reasoning <i>Michael Atighetchi, Nathaniel Soule, Ron Watro, and Joseph Loyall</i> | 39 |
| A Method for Evolutionary Decision Reconciliation, and Expert Theorems <i>Vladislav Protasov, Zinaida Potapova, and Eugene Melnikov</i> | 43 |
| Dynamic Deployment and Reconfiguration of Intelligent Mobile Cloud Applications Using Context-driven Probabilistic Models <i>Nayyab Zia Naqvi, Davy Preuveneers, and Yolande Berbers</i> | 48 |
| A Method of Applying Component-Based Software Technologies to Model Driven Development <i>Keinosuke Matsumoto, Tomoki Mizuno, and Naoki Mori</i> | 54 |
| ReALIS1.1: The Toolbox of Generalized Intensional Truth Evalation <i>Gabor Alberti and Laszlo Nothig</i> | 60 |
| A Comparative Study of Imputation Methods in Predicting Missing Attribute Values in DGA Datasets <i>Sahri Zahriah and Yusof Rubiyah</i> | 67 |

| | |
|--|-----|
| Unlike Behavior of Natural Frequencies in Bending Beam Vibrations with Boundary Damping in Context of Bio-inspired Sensors <i>Carsten Behn, Christoph Will, and Joachim Steigenberger</i> | 75 |
| Towards Semantic Facility Data Management <i>Ilkka Niskanen, Anu Purhonen, Jarkko Kuusijarvi, and Esa Halmetoja</i> | 85 |
| Complexity of Rule Sets Induced from Incomplete Data with Lost Values and Attribute-concept Values <i>Patrick G. Clark and Jerzy W. Grzymala-Busse</i> | 91 |
| Intelligent Technique to Accomplish a Effective Knowledge Retrieval from Dsitrributed Repositories. <i>Antonio Martin and Carlos Leon</i> | 97 |
| Self-managed Crowdsourcing <i>Vladislav Protasov, Zinaida Potapova, and Eugene Melnikov</i> | 103 |
| Refining the Scatteredness of Classes using Pheromone-Based Kohonen Self-Organizing Map (PKSOM) <i>Azlin Ahmad and Rubiyah Yusof</i> | 107 |
| Collision Estimation Using Single Camera <i>Ryunosuke Ikeno and Kazuyuki Ito</i> | 114 |
| Velocity Estimation from Visual Information using Environmental Property <i>Hitoki Takase and Kazuyuki Ito</i> | 118 |
