# Table of Contents

Implementation of a Self-Enforcing Network to Identify Determinants of the WiFi Quality on German Highspeed Trains  
*Jonathan Berrisch, Timo Rammert, and Christina Klauer*

A Linear Matrix Inequality Based Strategy For Maximum Amplitude Analysis in Discrete Time Systems  
*Graziano Chesi and Tiantian Shen*

A Comparison of Global and Saturated Probabilistic Approximations Using Characteristic Sets in Mining Incomplete Data  
*Patrick G. Clark, Jerzy W. Grzymala-Busse, Teresa Mroczek, and Rafal Niemiec*

Eager to Take Part in the Global AI Race? Better, Look for Traps Waiting There for You  
*Emanuel Diamant*

Improving Measurement by Addressing the Sensor Fault Isolation Problem in Control System  
*Thanh Nga Thai*

An Industry 4.0 Self Description Information Model for Software Components Contained in the Administration Shell  
*Luis Neto, Gil Goncalves, Pedro Torres, Rogerio Dionisio, and Sergio Malhao*

Path Planning for an Industrial Robotic Arm  
*Zahid Iqbal, Joao Reis, and Gil Goncalves*

Human-Machine Interaction in Cyber-Physical Production Systems  
*Henrique Lopes Cardoso, Joao Reis, and Gil Goncalves*
