

Table of Contents

A Density Based Clustering Algorithm for Efficient Channel Allocation in Multi-radio Multi-channel Wireless Mesh Networks <i>Sonia Mettali Gammar and Fethi Filali</i>	1
Performance Analysis of Pilot Aided OFDMA Systems for Mesh Networks <i>Jung-Hyun Kim, Jihyung Kim, Kwang Jae Lim, and Dong Seung Kwon</i>	8
A MAC Throughput over Rayleigh Fading Channel in The 802.11a/g/n-based Mobile LAN <i>Ha Cheol Lee</i>	14
Performance evaluation of handover policies in mobile heterogenous networks <i>Mircea Axente-Stan and Eugen Borcoci</i>	20
Design and Implementation of a Cooperative Protocol for Extending Coverage in Wireless Mesh Networks <i>Andres Cabrera-Lozoya, Fernando Cerdan, Sergio Lujan, and Diego Garcia-Sanchez</i>	26
IQRF Street Lighting - A Case Study <i>Rostislav Spinar, Martin Spiller, Petra Seflova, Vladimir Sulc, Radek Kuchta, and Radimir Vrba</i>	33
TenDoc: Network Coding-based Software for Wireless Ad hoc Networks <i>David Lim, Stephane Rousseau, Farid Benbadis, and Damien Lavaux</i>	39
Review of Trust-based File Sharing in Cloud Computing <i>Edna Dias Canedo, Robson de Oliveira Albuquerque, and Rafael Timoteo de Sousa Junior</i>	44
Connecting the Unconnected <i>Curtis Sahn and Hannah Thinyane</i>	51
