Table of Contents

Optimizing Certificate Validation in OT Environments Steffen Fries, Rainer Falk, and Andreas Guettinger	1
Threat-Based Vulnerability Management: Mapping CVEs to the MITRE ATT&CK Framework Logan McMahon and Oluwafemi Olukoya	6
Secure Software Brownfield Engineering – Sequence Diagram Identification Aspen Olmsted	14
Measurability: Toward Integrating Metrics into Ratings for Scalable Proactive Cybersecurity Management William Yurcik, Stephen North, Rhonda O'Kane, Sami Saydjari, Fabio Roberto de Miranda, Rodolfo da Silva Avelino, and Gregory Pluta	20
Identification of Dual Processes Using Power Side-channels Jakob Sternby, Niklas Lindskog, and Hakan Englund	27
General Conversion Scheme of Card-based Protocols for Two-colored Cards to Updown Cards ? the number of cards for computing an arbitrary function Takumi Sakurai and Yuichi Kaji	33
From ECU to VSOC: UDS Security Monitoring Strategies Ali Recai Yekta, Nicolas Loza, Jens Gramm, Michael Peter Schneider, and Stefan Katzenbeisser	40
DeepAuthVerify - A Modular Framework for Deepfake Detection in Facial Authentication Systems Domenico Di Palma, Alexander Lawall, and Kristina Schaaff	48
Comparison of Password-Authenticated Key Exchange Schemes on Android Jorn-Marc Schmidt and Alexander Lawall	55
Towards Automated Penetration Testing Using Inverse Soft-Q Learning Dongfang Song, Yuhong Li, Ala Berzinji, and Elias Seid	62
Hidden-Non-Malicious-Dummies for Evaluation of Defense Mechanisms of Industrial Control System against Steganographic Attacks Robert Altschaffel, Stefan Kiltz, Jana Dittmann, Tom Neubert, Laura Buxhoidt, Claus Vielhauer, Matthias Lange, and Rudiger Mecke	69
The Balanced Chance & Cyber?Risk Card: Extending Reichmann's Multidimensional Controlling Framework for C?Level Steering in SMEs Alexander Lawall and Maik Drozdzynski	76

Supporting the Security Modelling in Operational Technology by identifying capacities of Hidden Channels in ICS protocols Robert Altschaffel, Sonke Otten, Stefan Kiltz, and Jana Dittmann	83
Artificial Intelligence or Artificial Stupidity? The Inability of Small LLMs to Reason, Even Given the Correct Answer! Salvatore Vella, Salah Sharieh, and Alex Ferworn	89
Improving Crypto-Agility in Operational Technology through Exchangeable Smart Cards Tobias Frauenschlager and Jurgen Mottok	96
A Modular and Flexible OPC UA Testbed Prototype for Cybersecurity Research Sebastian Kraust, Peter Heller, and Jurgen Mottok	105
Towards Post-Quantum-Ready Automated Certificate Lifecycle Management in Operational Technology Ayham Alhulaibi, Tobias Frauenschlager, and Jurgen Mottok	112
Quantifying Persuasion - A Comparative Analysis of Cialdini's Principles in Phishing Attacks Alexander Lawall	117
A Modified Schnorr Sigma Protocol and Its Application to Isogeny-Based Identification Mahdi Mahdavi, Zaira Pindado, Amineh Sakhaie, and Helena Rifa-Pous	125
Evaluating User Perceptions of Privacy Protection in Smart Healthcare Services Huan Gua, Elias Seid, Yuhong Li, and Fredrik Blix	132
Cloud Security Misconfigurations and Compliance: An Empirical Model for DORA Readiness in Financial Environments Ali Ferzali, Naol Mengistu, Elias Seid, and Fredrik Blix	139
A Comparative Study of Machine Learning and Quantum Models for Spam Email Detection Cameron Williams, Taieba Tasnim, Berkeley Wu, Mohammad Rahman, and Fan Wu	147
